Trade-marks Journal

Vol. 63 No. 3208

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

GOODS

Class 09

Apparatus and instruments for the recording, transmission, processing, storage, and exchange of data, sounds, and images. Namely computer terminals used in the fields of payment, finance, telephony and telecommunications, transport, access control, identification of individuals and goods , sale; microprocessor and computer programs, namely operating system programs for computers and microprocessors, computer programs designed to read smart cards, to interpret, run, secure, convert, and modify data used in the fields of payment, finance, telephony and telecommunications, transport, access control, identification of individuals and goods, sale; computer software, namely application software for computer operating systems; programs for encrypting and decrypting computer data, circuits for encrypting and decrypting computer data, computer interfaces for communication, interface cards for communication, and interface modules for communication, namely network interface cards; modems, electronic data converters recorded on computer media, namely computer software used to convert text files from one format to another; electronic components, namely telephone chips and electronic chips for data management (CPU); chips, namely computer chips, electronic chips, chips for semiconductors; integrated circuits, microcircuits , printed circuits, printed circuit boards, semiconductors, processors, namely central processing units for running computer programs, microprocessors, microcontrollers, electronic tags and electronic tag readers, namely radiofrequency tags used for access control, inventory management , product traceability, anti-theft protection; electronic smart cards, namely blank smart cards, encoded smart cards containing programs, namely for use in the fields of electronic cash, transport, telecommunications, telephony, identification, and computer security, namely smart cards for personal identification, smart cards for automatic dialing, microcircuit calling cards, smart calling cards, identification cards for public transit, smart identity cards, identity cards with integrated microcircuits, encoded magnetic credit cards, encoded magnetic debit cards; memory cards, namely for electronic audio and video devices, namely memory cards for cameras and digital cameras, for portable telephones, for computers, for readers, namely smart card readers, digital compact disc players, for cameras, for photographic cameras, for electric and electronic locks, for electronic payment cards, namely debit cards and credit cards with embedded chips; access control cards, electronic anti-theft tags, namely electronic chips; electric and electronic locks; apparatus and instruments for access command, access control, identification and authentication of individuals and goods, namely touchless smart cards and touch smart cards used in the field of electronic cash, transport, telecommunications and telephony, identification, computer security; telephones, SIM (Subscriber Identity Module) cards; apparatus for the radio control of vehicles, namely radars and beacons; computers and computer peripherals, namely digital cameras, mice, scanners, readers, namely smart card readers, optical character readers, optical disc players, encoded magnetic card readers.

SERVICES

Class 35

(1) Retail, wholesale, mail order, online (via the Internet) sale of apparatus and instruments for the recording, transmission, processing, storage, and exchange of data, sounds, and images, namely computer terminals used in the fields of payment, finance, telephony and telecommunications, transport, access control, identification of individuals and goods, sale, computer and microprocessor programs, namely operating system programs for computers and microprocessors, computer programs designed to read smart cards, to interpret, run, secure, convert and modify data used in the fields of payment, finance, telephony and telecommunications, transport, access control, identification of individuals and goods, sale, computer software, namely application software for computer operating systems, programs for encrypting and decrypting computer data, circuits for encrypting and decrypting computer data, computer interfaces for communication, interface cards for communication, and interface modules for communication, namely network interface cards, modems, electronic data converters recorded on computer media, namely computer software used to convert text files from one format to another, electronic components, namely telephone chips and electronic chips for data management (CPU), chips, namely computer chips, electronic chips, chips for semiconductors, integrated circuits, microcircuits, printed circuits, printed circuit boards, semiconductors, processors, namely central processing units for running computer programs, microprocessors, microcontrollers, electronic tags and electronic tag readers, namely radiofrequency tags used for access control, inventory management, product traceability, anti-theft protection, electronic smart cards, namely blank smart cards, encoded smart cards containing programs, namely for use in the field of electronic cash, transport, telecommunications, telephony, identification, computer security, memory cards, namely for electronic audio and video devices, namely memory cards for cameras and digital cameras, for portable telephones, for computers, for readers, namely smart card readers, digital compact disc players, for cameras, for photographic cameras, for electric and electronic locks, for electronic payment cards, namely debit cards and credit cards with embedded chips, access control cards, electronic anti-theft tags, namely electronic chips, electric and electronic locks, apparatus and instruments for access command, access control, identification and authentication of individuals and goods, namely touchless smart cards and touch smart cards used in the field of electronic cash, transport, telecommunications and telephony, identification, computer security, telephones, SIM (Subscriber Identity Module) cards, apparatus for the radio control of vehicles, namely radars and beacons, computers and computer peripherals, namely digital cameras, mice, scanners, readers, namely smart card readers, optical character readers, optical disc players, encoded magnetic card readers.

Class 38

(2) Telecommunications and communications service, namely email services; communications services via computer networks, namely email services, provision of telecommunications networks, namely provision of multiple-user access to global computer networks for the transfer and dissemination of a wide range of information, provision of data and provision of access to databases, namely provision of access to an electronic database in the field of secure payment; provision of access to a global network and transmission of information contained in data banks, namely provision of multiple-user access to a global computer network; telecommunication engineering and data networking services, namely services rendered by engineers in the field of computer network security; dissemination of information in the field of computers through an Internet database, transfer of electronic funds, provision of access to a computer database in the field of computers via global information network; traceability of text, audio, and visual data on a network for data tracking purposes; transmission of text messages, voice messages, and images via computer, namely recording, storage, and transmission of voice messages and text messages by telephone and by computer; telecommunications forwarding and linking services for the benefit of others, namely connection services providing access to the Internet and to all global and non-global computer networks; information services, namely dissemination of information via computer database, assistance services, consulting and advisory services in the field of telecommunications, namely technical consulting in the fields of secure payment and computer network security.

Class 42

(3) Design and development of computer hardware, computer programs, integrated circuits, microcontrollers, computer chips, design of computer and microprocessor programs, microprocessor programming, computer programming services, design, development, and technical study of computer systems, design, development, and technical study of data exchange systems, in the field of touch technology; technical support in the field of the communication of text, audio, and visual data, namely technical consulting in the fields of secure payment and computer network security; remote monitoring of computer systems; design, development, customization, updating of computer software and computer programs, design, development, customization, and technical study of smart cards and electronic cards, integrated circuit cards, microcircuit cards, magnetic cards, memory cards, and touchless cards, namely study and customized programming of smart cards and electronic cards for the benefit of others; research and development of new products for the benefit of others; information services, namely dissemination of information through a computer database, consulting and advisory services in the field of computers; development of touchless solutions in the field of telecommunications and communications, namely radio frequency identification (RFID) and wireless communication.

Videotaping; video editing; entertainment in the form of television shows; providing smart phone games and tablet computer games, and information about mobile games; Electronic games services, namely provision of computer games on line and by means of a global computer network; organization of competitions in the field of computer gaming; Development of computer games; Providing a web site featuring on-line computer games and information about computer games; Production of video games; Providing entertainment services in the form of games and competitions, namely word games, puzzles and quizzes; Providing information to game players about the ranking of their scores of games through the web sites; Providing interactive multi-player computer games via the Internet and electronic communication networks; Design of computer software/webpages/websites, design of computer systems; Licensing of intellectual property rights; Granting of user and distribution rights for on-going audiovisual programs provided over the Internet and television namely, television shows (legal services); Legal services for the management and negotiation of contracts for the purchase of distribution rights for audiovisual programs; Awarding contracts for the purchase of distribution rights for on-going audiovisual programs provided over the Internet and television namely, television shows; Licensing of computer games.

GOODS

Cards with integrated circuits, namely, memory cards and cards with microprocessors (IC-cards) for communication with external data-processing equipment, in particular for data acquisition of personal and biometric data, encryption of the acquired data and transfer of the acquired data to databases, personal identity verification and user authentication; data processing equipment, namely terminals for communication with IC-cards, in particular electronic readers for IC-cards; recording media, namely CD ROMS, floppy disks, hard disks, solid state memory cards, solid state memory sticks, with programs regarding operating system software and application software for both IC-cards and components for reading and personalising IC-cards and with programs for the developing, administrating and maintenance of such software; operating-system software and application software for IC-cards and IC-card terminals; computer hardware, in particular semiconductors and microprocessors, integrated circuits; hardware and software for computer networks and communication networks, in particular for identification of persons using biometric data and personal information data; computer programs for the development, management and servicing of operating system software and application software for both IC-cards and components for reading and personalising IC-cards; paper, plastic, and a combination of paper and plastic security type printed products equipped with electronic components, namely chips and display screens, in particular bank notes, certificates representing monetary value, such as stocks, shares, bonds, checks, traveler's checks, event admission tickets, transport tickets, credit cards, health cards, visas, identification badges, passports, driving licenses, personal identification cards, security labels, revenue stamps; electronic components, namely computer chips, transponders, radio antennas, RFID-tags, magnetic sensors, optical sensors and electric sensors, for use in security-type printed products, namely bank notes, certificates representing monetary value, such as stocks, shares, bonds, checks, traveller's checks, event admission tickets, transport tickets, credit cards, health cards, visas, identification badges, passports, driving licenses, personal identification cards, security labels, revenue stamps; paper, plastic, and a combination of paper and plastic security type printed products, in particular for use for and as bank notes, certificates representing monetary value, such as stocks, shares, bonds, checks, traveler's checks, event admission tickets, transport tickets, credit cards, health cards, visas, identification badges, passports, driving licenses, personal identification cards, security labels, and revenue stamps; unprinted paper without electronic components for security-type printed products, in particular for use for and as bank notes, certificates representing monetary value, such as stocks, shares, bonds , checks, traveler's checks, event admission tickets, transport tickets, credit cards, health cards, visas, identification badges, passports, driving licenses, personal identification cards, security labels, and revenue stamps; plastic foils, other than for packaging, for use in security-type printed products, in particular for use for and as bank notes, certificates representing monetary value, such as stocks, shares, bonds, checks, traveler's checks, event admission tickets, transport tickets, credit cards, health cards, visas, identification badges, passports, driving licenses, personal identification cards, security labels, and revenue stamps.

SERVICES

Contactless transmission of personal identification and user data for verification and identity checking; Development of operating-system software and application software for IC cards and data-processing equipment, in particular for use in security-relevant applications for contact-type and contactless transfer, in particular for verification and identity checking; servicing and technical data-processing consultancy with regard to the use and application of such operating-system software and such application software; user and rights management on computer networks with regard to the use and application of such operating-system software and such application software; consultancy in the production of forgery-proof documents; consultancy in the field of security and product protection, in particular for security technologies making use of computer chips, transponders, antennas, sensors, optically variable elements, security paper, copy protection.

Colour Claim
Colour is claimed as a feature of the trade-mark. The letters are white and the square background is blue.

GOODS

(1) Downloadable software, namely, computer software and mobile applications for conducting account transactions, securities trades, research, analysis and portfolio management activities, all in the fields of finance and investments; downloadable software, namely, computer software and mobile applications for accessing, viewing, downloading, sharing, managing and saving account data, news, research and information in the fields of finance and investing; downloadable software, namely, computer software and mobile applications for allowing clients to call a financial services representative and to send feedback via electronic communications directly with a financial services representative.

(2) Downloadable electronic publications, namely, brochures, newsletters, reports and instructional and teaching materials in the fields of investments, finance, business, financial planning, portfolio management, retirement planning, money management and asset allocation.

SERVICES

A full line of financial and investment services, namely providing wealth management, securities brokerage, money management and financial advisory services to individual investors and independent investment professionals, mutual fund services, financial planning and investment advice, retirement plan and equity compensation plan services, providing referrals to independent fee-based investment advisors, and providing custodial, operational and trading support for independent, fee-based investment advisors; Educational services, namely, conducting seminars, webcasts, on-line training sessions, classes, conferences and workshops in the fields of investment , finance, business, financial planning, portfolio management, retirement planning, money management, and asset allocation.

GOODS

Computer software for providing access to a global computer network; computer software for delivering online content, namely, third party text, video, data, ecommerce applications and web sites to end-users and consumers; computer hardware, namely, computer servers for hosting third party web content, streaming media and software applications.

SERVICES

(1) Delivering third party web content and software applications from a network of managed servers to provide accelerated multiple-user access to a global computer information network; streaming of audio, visual, text, video and audiovisual material on the Internet, namely, providing content delivery network (CDN) services that dynamically stream and organize third party web content for optimized flow to end users.

(2) Electronic storage of data, namely, third party web content.

(3) Data transmission of computer network data or information, namely, converting third party digital content to make it compatible with delivery to users through a content delivery network; computer systems integration services, namely, integration of third party web content and streaming of media and computer applications; providing computerized digital rights management, namely operating a system for use by third parties for protecting copyright of digital content that is distributed online; web site traffic analysis, namely, providing web site content providers with information identifying the geographic and network point-of-origin of web site requests; providing global traffic management services to content providers who operate mirrored web sites, namely, tracking changing conditions on the Internet and directing users to the distributed sites that are optimal for them; providing web site traffic monitoring and reporting services; providing on-line customer support featuring reporting tools, personalized technical support and troubleshooting, and information and news about the computer industry.

GOODS

(1) Electric and electronic motor control devices for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots; automatic controllers for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots; electric and electronic motors for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots; motor reducers for doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots; electrical and electronic apparatus and instruments, namely presence detectors, motion detectors, rotation sensors, position sensors, vibration sensors, light sensors, lighting detectors, moisture sensors, snow sensors, temperature sensors, surveillance cameras, webcams, lighting receivers, light receivers, programmers, programmable thermostats, electricity consumption sensors, graphical user interfaces and human machine interfaces for heating, open sensors for doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, and security grilles, for processing, memorizing, transmitting, disseminating, receiving information related to the automation and management of devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, retractable boundary elements for delineating lots, activating and deactivating lighting, ventilation, air conditioning, heating, security systems, access control systems, surveillance cameras, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat, and other types of energy, namely solar and gas. Graphical user interfaces and human machine interfaces for software intended for processing, memorizing, transmitting, disseminating, and receiving information related to automation functions in the field of home automation; wind sensors, sunlight sensors, temperature sensors, rain sensors, for electric devices used to control lighting, security alarm and fire alarm control panels, indoor blinds, window shutters, and radiant heating for household use.

(2) Electric and electronic remote control apparatus, namely differential switches and remote controls for starting electric and electronic motors, digital display timers and electronic controls that include a computer program used in the field of home automation for devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots, for use namely on an Internet communication network and mobile telephones, enabling the installation, configuration, operation, management, monitoring, namely from computers and mobile telephones, of automation functions in the field of home automation and motorization functions for shutters, blinds, the opening of windows, locks, doors, gates, safety barriers made of metal, and security grilles for access control, the activation of lighting, ventilation, air conditioning, heating, the control, the management of security systems, access control systems, surveillance cameras, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat , and other types of energy, namely solar and gas; software for the installation, configuration, control, management, and monitoring of automation functions in the field of home automation and

motorization functions for shutters, blinds, the opening of windows, locks, doors, gates, safety barriers made of metal, and security grilles, for access control, the activation of lighting, ventilation, air conditioning, heating, the control, the management of security systems, access control systems, surveillance cameras, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat, and other types of energy, namely solar and gas; servers used in the field of home automation for receiving and transmitting remote control commands to electric and electronic devices and instruments that control the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots, as well as for operating the storage of information received from these devices and instruments; modems for automation stations, namely modems for devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers used in the field of home automation; electric connector cables for computer networks; smart terminals for the automation and management of devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots; computer and communications transmitters and receivers, namely transceivers, radio transmitters, and video transmitters used in the field of home automation; electronic docking stations and electronic tablets for the automation and management of devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots, activating and deactivating lighting, ventilation, air conditioning, heating, security systems, access control systems, surveillance cameras, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat, and other types of energy, namely solar and gas; smart terminals for commercial and residential buildings; portable electronic devices, namely cellular telephones, tablets for the wireless reception and transmission of information for the remote management and automation of devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots. Electronic instruction brochures, guides, and manuals concerning the automation of devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots, activating and deactivating lighting, ventilation, air conditioning, heating, security systems, access control systems, surveillance cameras, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat, and other types of energy, namely solar and gas.

(3) All-purpose batteries, all-purpose electric batteries, rechargeable all-purpose batteries; remotely controlled electric clamping bushes.

(4) Electric devices, namely differential switches, remote controls for the opening and closing of gates, safety barriers made of metal; electric and electronic motors for operating gates, safety barriers made of metal; electric and electronic apparatus, namely presence detectors, motion detectors, rotation sensors, position sensors, vibration sensors, light sensors, lighting detectors, moisture sensors, snow detectors, temperature sensors, surveillance cameras and webcams for the control, the management of security, access control, monitoring systems, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat, and other types of energy, namely solar and gas; presence detectors, indoor lighting sensors, alarm sensors, namely glass break sensors, water sensors, electric outage sensors, door and window open sensors, motion detectors, proximity sensors, fire and smoke detectors, motion sensors; smoke detectors; proximity sensors, fire and smoke detectors, motion and smoke detectors. Video telephones; thermostats; video surveillance cameras; electrical sockets; electrical plugs and sockets; sirens; apparatus for visual recognition, namely computer software and apparatus for recognizing optical characters. Luminous beacons for safety and signalling; light signalling devices, namely signal beacons, flashing signalling lights, signal lights, emergency light signalling devices; electric and electronic apparatus and installations for security and access control, namely security grilles for access control, facilities management software for controlling access to buildings and security systems.

(5) Electric and electronic motor control devices for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots; automatic controllers for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots; electric and electronic motors for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots; motor reducers for doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots.

(6) Electric and electronic apparatus and instruments, namely presence detectors, motion detectors , rotation sensors, position sensors, vibration sensors, light sensors, lighting detectors, moisture sensors, snow sensors, temperature sensors, surveillance cameras, webcams, lighting receivers, light receivers, programmers, programmable thermostats, electricity consumption sensors, graphical user interfaces and human machine interfaces for heating, open sensors for doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, and security grilles, for processing, memorizing , transmitting, disseminating, receiving information related to the automation and management of devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, retractable boundary elements for delineating lots, activating and deactivating lighting, ventilation, air conditioning, heating, security systems, access control systems, surveillance cameras, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat, and other types of energy, namely solar and gas. Graphical user interfaces and human machine interfaces for software intended for processing, memorizing, transmitting, disseminating, and receiving information related

to automation functions in the field of home automation; electric and electronic remote control apparatus, namely differential switches and remote controls for starting electric and electronic motors, digital display timers and electronic controls including a computer program used in the field of home automation for devices used to control electric and electronic motors, automatic controllers , electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots, for use namely on an Internet communication network and mobile telephones, enabling the installation, configuration, control, management, monitoring, namely from computers and mobile telephones, of automation functions in the field of home automation and motorization functions for shutters, blinds, the opening of windows, locks, doors, gates, safety barriers made of metal, and security grilles for access control, the activation of lighting, ventilation, air conditioning, heating, the control, the management of security systems, access control systems, surveillance cameras, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat, and other types of energy, namely solar and gas; software for the installation, configuration, operation, management, and monitoring of automation functions in the fields of home automation and motorization functions for shutters, blinds, the opening of windows, locks, doors, gates, safety barriers made of metal, and security grilles, for access control, the activation of lighting, ventilation, air conditioning, heating, the control, the management of security systems, access control systems, surveillance cameras, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat , and other types of energy, namely solar and gas; servers used in the field of home automation for receiving and transmitting remote control commands to electric and electronic devices and instruments that control the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots, as well as for operating the storage of information received from these devices and instruments; modems for automation stations, namely modems for devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers used in the field of home automation; electric connector cables for computer networks; smart terminals for the automation and management of devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots; computer and communication transmitters and receivers, namely transceivers, radio transmitters, and video transmitters used in the field of home automation; electronic docking stations and electronic tablets for the automation and management of devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots, activating and deactivating lighting, ventilation, air conditioning, heating, security systems, access control systems, surveillance cameras, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat , and other types of energy, namely solar and gas; smart terminals for commercial and residential buildings; portable electronic devices, namely cellular telephones, tablets for the wireless reception and transmission of information for the remote automation and management of devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows, shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots. Electronic instruction brochures, guides, and manuals concerning the automation of devices for controlling electric and electronic motors, automatic controllers, electric and electronic motors, and motor reducers, all for controlling the opening and closing of doors, windows , shutters, blinds, curtains, room partition panels, panels for projecting images, locks, garage doors, gates, safety barriers made of metal, security grilles for access control, and retractable boundary elements for delineating lots, activating and deactivating lighting, ventilation, air conditioning, heating, security systems, access control systems, surveillance cameras, security alarms, fire alarms, apparatus for managing electric current and the consumption of electricity, heat, and other types of energy, namely solar and gas. Presence detectors, wind sensors, indoor lighting sensors, sunlight sensors, temperature sensors, rain sensors, for electric devices used to control lighting, security alarm and fire alarm control panels, indoor blinds, window shutters, and radiant heating for household use. Smoke detectors; proximity sensors, fire and smoke detectors, motion and smoke detectors. Video telephones; thermostats; video surveillance cameras; electrical sockets; electrical plugs and sockets; sirens; apparatus for visual recognition, namely computer software and apparatus for recognizing optical characters. All-purpose batteries, all-purpose electrical batteries, rechargeable all-purpose batteries; luminous beacons for safety and signalling; light signalling devices, namely signal beacons, flashing signalling lights, signal lights, emergency light signalling devices; electric and electronic apparatus and installations for security and access control, namely security grilles for access control, facilities management software for controlling access to buildings and security systems; remotely controlled electric clamping bushes.

DONNA'S CARIBBEAN RESTAURANT

Image Description (Vienna)

- Ellipses
- One circle or ellipse
- Circles or ellipses containing one or more letters
- Red, pink, orange
- Yellow, gold
- Green
- Black

Trademark Description

The mark consists of the word 'DONNA'S' in stylized script over the words 'CARIBBEAN RESTAURANT' in cursive script. The letter 'D' in 'DONNA'S' is in the color red with a black border and is a larger type than 'ONNA'S'. 'ONNA'S' is in the color yellow with a black border. The words ' CARIBBEAN RESTAURANT' are in the color green and are placed on a yellow oval design outlined in the color green.

Colour Claim

Colour is claimed as a feature of the trade-mark. The color(s) red, yellow, green, and black is/are claimed as a feature of the mark. The letter 'D' in 'DONNA'S' is in the color red with a black border and is a larger type than 'ONNA'S'. 'ONNA'S' is in the color yellow with a black border. The words ' CARIBBEAN RESTAURANT' are in the color green and are placed on a yellow oval design outlined in the color green.

Representative for Service
GOWLING WLG (CANADA) LLP
SUITE 1600, 1 FIRST CANADIAN PLACE, 100 KING STREET WEST, TORONTO, ONTARIO, M5X1G5

TRADEMARK

Index Headings
G

Image Description (Vienna)
- Letters or numerals forming geometrical figures, written or typographical matter in perspective
- Letters or numerals forming any other quadrilateral (surface or periphery)
- Rhombs or squares standing on one of the corners thereof
- Other irregular parallelograms, trapezia and quadrilaterals, quadrilaterals containing one or more rounded corners
- Several quadrilaterals juxtaposed, joined or intersecting
- Quadrilaterals with dark surfaces or parts of surfaces
- Letters presenting a special form of writing
- One letter
- Blue
- Black
- White, grey, silver

Colour Claim

Colour is claimed as a feature of the trade-mark. The color(s) blue, black, and white is/are claimed as a feature of the mark. The mark consists of a stylized capital letter 'G' shaped like a rounded square, rotated approximately 45 degrees counter-clockwise, with a black shadow underneath it. A white line surrounds the entire symbol, and a white line separates the upper blue body from the lower black shadow. The body of the 'G' is darker blue at the bottom, and fades to a lighter blue, and eventually to white at the top.

PACHARAN PAMPLONICA

Image Description (Vienna)
- Labels, collarettes (bottle-neck labels) – Note: Not including tie-on labels (20.5.15).
- Other labels
- Surfaces or backgrounds covered with lines or bands
- Surfaces or backgrounds covered with straight lines or bands
- Red, pink, orange
- White, grey, silver

Trademark Description

The trade-mark is two dimensional, consisting of the words and label. The bottle shown in dotted outline does not form part of the trade-mark.

Colour Claim

Colour is claimed as a feature of the trade-mark. The colours red and white are claimed as features of the trade-mark. The letters PA CHA RAN are made up of a plurality of equally spaced diagonal white lines. The letters PAM PLO NICA are in the colour 'white'. The horizontal line beneath the lettering is in the colour 'red'.

Foreign Character Translation

As provided by the Applicant, the term 'PACHARAN' can be translated into English as 'sloe brandy'. The term PAMPLONICA is the colloquial form of PAMPLONÉS, which is the formal name of inhabitants of the city of Pamplona.

GOODS

Pacharan, brandy.
